SUMMARY

Full-Stack Developer with practical experience in the MERN stack, having built and delivered web applications across internships and academic projects. Proficient in React JS for frontend development, Node JS and Express JS for backend APIs, and MySQL and MongoDB for database management. A consistent learner and team collaborator, looking to contribute meaningfully to a product-driven software development team.

EXPERIENCE

Software Development Intern 02/2025 - 07/2025

Mistral Solutions

AI-powered SaaS product

- Built the Interview Trainer UI using React JS with dynamic question flows and real-time feedback display across multiple interview categories.
- Developed the Resume Evaluator interface where users can upload resumes and view AI-generated scores and suggestions returned from the backend.
- Consumed REST APIs to connect frontend components with backend NLP services, handling loading states, error boundaries, and response rendering.
- Ensured fully responsive design using Tailwind CSS / CSS for seamless experience across desktop and mobile devices.

MERN Stack Intern 03/2024 - 06/2024

Web Stack Academy

Online

MERN-stack web development training

- Built Homely Hub, a hotel booking platform using the MERN stack (MongoDB, Express JS, React JS, Node JS).
- Implemented search, filter, and booking workflows with a responsive UI, ensuring cross-device compatibility.
- Designed and integrated RESTful APIs for hotel listings, user authentication, and booking management.
- Used Git for version control throughout the project lifecycle with regular commits and branch management.

PROJECTS

Faculty Performance Appraisal System 02/2025 - 05/2025

Kovilpatti, Tamil Nadu

A web application for college administration to evaluate faculty performance

- Designed a role-based web application to evaluate faculty across teaching, research, and professional development KPIs. Built secure login and dashboard for two roles (admin and evaluator) with different access controls and data views.
- Developed RESTful APIs using Express JS and Node JS, structured MySQL schema for performance data and scoring.
- Reduced manual appraisal effort by digitising the entire workflow into a single platform.

Faculty Recruitment Portal 03/2025 - 05/2025

Kovilpatti, Tamil Nadu

A structured recruitment portal integrating application management for candidates and admins

- Built an end-to-end recruitment portal enabling candidates to apply online and administrators to track applications through a structured pipeline.
- Designed the database schema and developed the frontend using React JS, integrated backend APIs for application submission and status management.
- Implemented form validation, file upload support, and an admin dashboard with real-time application tracking.

EDUCATION

B.Tech, Information Technology

National Engineering College

8.13 CGPA
